Surname, First name	Smith, John
DOB	01-01-1990
Sex	male
Laboratory #	20000010
Date collected	01-01-2019
Date received	01-01-2019
Report date	03-01-2019

Laboratory report

Enclosed you will find the results of your laboratory examination. In addition to your results you will also receive a brief summary of the correlating effects, regarding the tested parameters. These are compiled without any knowledge on the clinical background and as such, may only be used as an interpretation aid. In case of health problems, please consult a doctor or practitioner for medical treatment and accompaniment for making the best decisions for your health. We explicitly warn against beginning, suspending or changing any medication or therapy without consulting your doctor or practitioner.

Test: Gluten Intolerance Test

Sample material: stool

Analyte	Result	Reference range	Result
Gut Mucosal Immunology			
Secretory IgA	600	510-2040 µg/ml	
Coeliac diagnostics			
Anti-Transglutaminase slgA	120	< 90 U/l: normal 90-110 U/l: marginal > 110 U/l: increased	

Surname, First name	DOB	Laboratory #	Report date
Smith, John	01-01-1990	20000010	03-01-2019

Secretory IgA (sIgA) is within the reference range.

Increased fecal Anti-Gliadin-IgA antibodies indicate the possibility of a celiac disease (sprue, gluten-enteropathy). The value returns to normal by following a gluten-free diet. Based on the dietary implications of the result, the diagnosis should be confirmed by use of biopsy oder IgE Antigliadin in blood. Antibody determinations in stool are recommended for therapy-control (gluten-free diet).

Yours sincerely,
Your laboratory team
